# 1 Subfile Template

This is a template for a subfile for a L<sup>A</sup>T<sub>E</sub>X project. To be able to use this file you need to call it in the **main.tex** file with the following command:

```
\subfile{section/subfile.tex}
```

The path can be edited to import file from different locations.

You may replace this section between the code comment to write your own.

**Note:** All subfile from this template always start as a new page, if you wish not to remove the \newpage at the top of the file.

## **2 Section - 1**

### **2.1 Subsection - 1**

#### **2.1.1 Subsubsection - 1**

### 3 Section - 2

#### 3.1 Subsection - 2

##### 3.1.1 Subsubsection - 2
